specs

- Chrome plated steel rims.
- Polished stainless or chrome plated steel spokes & chrome plated nipples.
- Chrome plated billet aluminum hubs.
- All internal bearings, races, seals and spacers are installed and all bearing end-play is set at factory.
- Wheels are designed for custom applications and to replace stock sizes on most late model ('84 and up) Harley-Davidson® motorcycles - including V-Rods - using existing hardware*.

skinny

- 87 years experience building custom wire spoke-laced wheels - No one has been doing it longer.
- CNC milled hubs and CNC dimpled rims for precise fit, strength and trueness.
- All 16" and 18" wheels are factory sealed to run tubeless tires.
- All tubeless designed wheels come complete with valve stems.
- The 80 spoke wheels use oversized .203" wire swaged to .192" in a cross-laced pattern.
- OEM spec chrome plating, all in-house facilities.
